Thanks for the insight, Tim –

I just sent an email to Stephen/Issac, making the recommended request you noted.

**Thank you,**

**Ryan Falch, P.E.** **(WI, MN, VA, SD)**

**Subject:** WisDNR Requests (BRRTS Site #02-13-584369)

**This Message Is From an External Sender**

This message came from outside your organization.

Hi Ryan,
I prepared the semi-annual progress report from July 2025. I submitted it to WDNR after Mark Papko's review.
The Airport is not required to do additional creek sampling by the WPDES permit or any other correspondence that I am aware of. I would recommend checking with your legal counsel to see what they think. At a minimum, I recommend having WDNR submit the request in writing. If you do wish to proceed with creek sampling, I would recommend doing the

sampling 3-6 times and include flow measurement when sampling. This is important for seeing the variability of the data and calculating the mass loading of the PFAS compounds. The only information shared with WDNR on the Darwin Street site is the post installation report that detailed the quantities of materials used during the remediation construction. This did not include any groundwater monitoring data. There is no current requirement for submitting the monitoring data from the Darwin Street site until the end of the one-year sampling period. I would recommend you request WDNR submit in writing the request for interim data reporting and ask for the code section that requires it. It would make sense to report this data in the next semi-annual progress report due by the end of December 2025.
Let us know if you want Mead & Hunt's assistance in setting up the sampling and/or preparing an interim report on the Darwin site.
Sincerely,

**Tim Astfalk, PE, ENV SP** (He, Him, His)
