Hi Andrew –

Please find the attached December 2025 Progress Report. I tweaked a few things, but formatted/signed it with DCRA letterhead.

I don't have a full grasp on how to get this uploaded to the BRRTS site, but please take necessary steps to get it submitted today on our behalf.

Additionally – can you share the 3-Month/6-Month ORIN reports too with WisDNR/Stephen Ales separately? I'd request those reports **do not** be submitted to BRRTS/get attached to the progress report. I'm OOO today so tasking M&H with it. Sharing with Stephen as for more his awareness and he asked for them previously.

Thanks for compiling! Hope you had a good Holidays so far!

**Thank you,**

**Subject:** Draft PFAS Semi-Annual Report Progress Report

**This Message Is From an External Sender**

This message came from outside your organization.

Ryan,

See attached draft PFAS Semi-Annual Report Progress Report and proposed attachment. We stayed with Fehr Graham's report conclusions and added minor edits so the conclusions are not taken out of context. Primarily Fehr Graham's statements about Chapter NR 140 groundwater standards. My understanding is that PFAS groundwater quality limits are currently not incorporated into Wisconsin Admin code but have been recommended to DNR by the Department of Health Services (DHS). Fehr Graham describes this in earlier sections of their reports.

Let me know if you have any questions, comments, or proposed changes.
