---

Bill,

Found a handful of references to the OLDCC local match component. References attached, but it's summarized below:

- The first attachment is an update sent to the board in June of 2023, which references the previous grant application, "**Project manager hired and work with the federal grant to the WI Department of Military Affairs for the community outreach plan has begun. DCRA provided the funding for the local match required to secure the grant**."

- The second attachment is an email summarizing a phone call with (and from) the ADO, which references what *can* be used as local match. This email predates the first attachment.

- The third attachment is a *very* length email chain triggered by a media inquiry in September 2024 specifically asking about the grant's local match. The result of the inquiry boiled down to, "**The composition of the 10% match hasn't been determined yet, but we don't see that as a major obstacle.**"

- The fourth attachment is another update to the board, dated March 2024, which references the OLDCC application, "**This is the grant that DCRA provided the required local match for last year and is being administered by DMA**."
