Ryan,

See attached draft PFAS Semi-Annual Report Progress Report and proposed attachment. We stayed with Fehr Graham's report conclusions and added minor edits so the conclusions are not taken out of context. Primarily Fehr Graham's statements about Chapter NR 140 groundwater standards. My understanding is that PFAS groundwater quality limits are currently not incorporated into Wisconsin Admin code but have been recommended to DNR by the Department of Health Services (DHS). Fehr Graham describes this in earlier sections of their reports.

Let me know if you have any questions, comments, or proposed changes.
