Statement on changes to gender-affirming care at UW Health

•

📅 2mo ago • 👁 27 Views

Content

UW Health is committed to providing high-quality, compassionate and patient-centered care to our patients and families, including LGBTQ+ patients. Due to recent federal actions, UW Health is pausing prescribing puberty blockers and hormone therapy as part of gender-affirming care for patients under 18 years of age. We recognize the uncertainty faced by our impacted patients and families seeking this gender affirming care and will continue to support their health and well-being.
